EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

1. A method for measuring, in one assay, cholesterol in low density lipoprotein and total cholesterol in a biological sample, said method comprising:
 - (i) introducing in said sample a first reagent that acts on the cholesterol in lipoproteins other than low density lipoprotein to generate a compound, and then measuring the absorbance of said compound; and subsequently
 - (ii) introducing in the same sample from step (i) a second reagent that acts on at least the low density lipoprotein to generate an additional amount of said compound, and then measuring the elevated absorbance of said compound,wherein:
(A) the first reagent has an HLB value of 13 or more and 15 or less and the second reagent has an HLB value of 11 or more and 12 or less; and

(B) the value from step (i) represents the amount of cholesterol in lipoproteins other than low density lipoprotein, the value from step (ii) represents the amount of total cholesterol in said sample, and the difference in values from step (i) and step (ii) represents the amount of cholesterol in low density lipoprotein.

16. The method of claim 13, wherein said cholesterol esterase is produced by bacteria ~~Pseudomonas~~ Pseudomonas.

19. The method of claim 17, wherein said cholesterol esterase is produced by bacteria ~~Pseudomonas~~ Pseudomonas.

The following is an examiner's statement of reasons for allowance: The closest Prior Art of record, the Shull *et al.* Patent, does not teach or suggest the separate and subsequent steps of treating a sample with a first reagent that acts on cholesterol in lipoproteins other than low density lipoprotein to generate a compound and measuring the absorbance of the compound, then introducing into the same sample from the first step a second reagent that acts on at least the low density lipoprotein to generate an additional amount of said compound, and then measuring the elevated absorbance of said compound, and wherein the first reagent has an HLB value of 13 or more and 15 or less and the second reagent has an HLB value of 11 or more and 12 or less.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1 and 13-24 are allowed.
